

By integrating decorative elements such as textiles and traditional ceramic decors, it is possible to achieve spaces with a tremendous personality and cutting-edge style, which at the same time are warm and inviting. The aim is to achieve a concept of decoration that brings together the past and the present, in which the new appears to be old, and the old appears to be modern, elegant and inviting.

This type of product fits perfectly into the philosophy of Roberto Verino, creating spaces that are elegant and comfortable, in purest Urban Vintage style.
